

# Platts M2MS-Power (North America) coverage guide

Platts M2MS-Power provides independent assessments of North America monthly forward power prices at 164 peak and off-peak hubs in 5 regional packages. Daily 10-year and semi-monthly 20-year curves are derived using a combination of Intercontinental Exchange (ICE) activity and settlement data, broker quotes, and sophisticated quantitative techniques. Monthly price granularity and an open and validated methodology bring greater transparency to forward power markets.

## Key features of Platts M2MS-Power

- Published daily, 120-month (10-year) forward curves provide market-based forward prices with monthly granularity
- Published semi-monthly, 240-month (20-year) forward curves combine current 120-month daily forward assessments with 240-month price extensions incorporating market fundamentals
- Published daily, 36-month (3-year) forward heat rates are calculated as the ratio between M2MS-Power/Henry Hub and M2MS-Power/Specified Regional Hub at the same delivery month

**Platts, the exclusive publisher of ICE-driven forward curves, offers curves for 77 power locations in 5 regional packages.**
